Sample Test Cases for Braille Autocorrect System

Sample Test Cases

Test Case 1: Valid Input, Correct Suggestion

Input:

```
D W
D
W K O
```

Explanation:

- `D W` → dots 1-2 → `b`
- `D` → dot 1 → `a`
- `W K O` → dots 2-4-5 → `j`

Typed word: `baj`
Suggested word: `bat`

Test Case 2: Single Character Input

Input:

```
D
```

Explanation:

- `D` → dot 1 → `a`

Typed word: `a`
Suggested word: `bat`

Test Case 3: Invalid Key Input

Input:

```
D W X
```

Explanation: `X` is an invalid key and will be rejected by the program. The input will be discarded.
Output: Error message shown - "Invalid key 'X'. Use only D, W, Q, K, O, P."
